BETTER TILLAGE SOLUTIONS

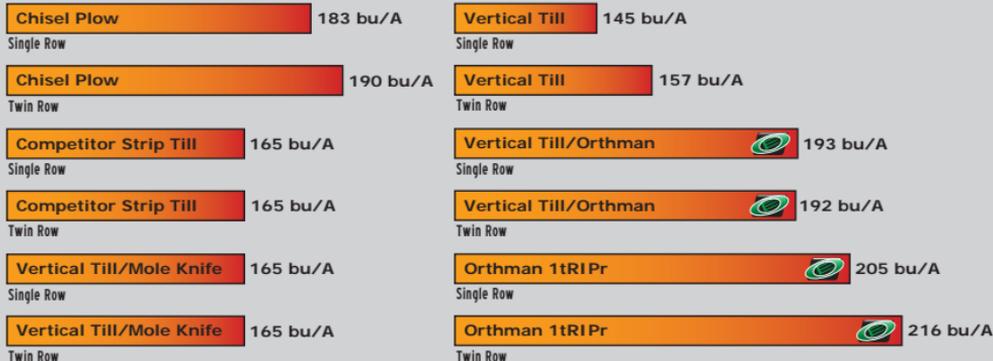

First Full Report of Trials from our Partners in Peoria, Illinois.

We wanted you to take a look at Orthman Strip-Till results in single row and twin-row in a dry year for the Corn Belt. Thanks to everyone involved. We are excited to get this information out to Illinois growers.

Getting the plants off to a good start is important and we could tell the minute the combine poked into the field. We planted and fertilized identically to truly see the results of different tillage choices. We hope you enjoy our plot results.

## test results

- Mackenzie

All bu/A figures @ 15% mst. All plot populations planted @ 36,000 on 30" centers. Test weights ranged from 56.7 to 58.7. Report by Dan Parker, Channel Seed Co.
