

Strip TILL SUCCESS

fall HARVEST *Indiana*

Offers Clues to Better Placement of Fertility Giving Results that Pay.....

In the north central area of Indiana, Clunette Elevator and Grain are focused on making a difference for their customers. Orthman has chosen to step up with Gabe and Jared at Clunette to develop trials looking at fertilizer placement and options for Indiana growers.

Can strip-till make a difference on your farm? With two years under our belt in cooperative trials, we believe that strip-till produces sustainable yields that will put money in the grower's pocket.

Orthman Manufacturing encourages all growers to look into this sound strip-tillage management system. We welcome any and all to contact us via: www.orthmanag.com, contact our reps, a local dealer, the boys at Clunette Elevator or Adam Souder, our Indiana - Ohio - Kentucky - Michigan representative at asouder@orthman.com
